

I/O Relay Terminal **G70V**

I/O Relay Terminals with 16 Points and Push-In Plus terminal blocks to **Downsize Control Panels and Save** Labor

- I/O Relay Terminals with 16 points to mount G2RV Slim I/O
- Push-In Plus terminal blocks are used to save wiring work in comparison with traditional screw terminals. (Wiring time is reduced by 60% ***1** in comparison with traditional screw terminals.)
- Work is reduced ever further with one-step cable connection to the PLC.
- Diode provided for coil surge absorption.
- Operation indicators for immediate recognition of I/O signal
- Accepts G3RV Slim I/O SSRs. *2
- Greatly reduce wiring work and maximize space efficiency with new models that provide internal connections between I/O terminals. (input models: 16 point/common, output models: 4 points/common)
- DIN Track or screw mounting.
- *1. According to OMRON actual measurement data from November 2015.
- *2. Mounting of some models is not possible.

Refer to Safety Precautions on page 22.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Model Number Legend

G70V - 🗆 🗆 🗆 16 P - 🗆 -(1) (2) (3) (4) (5) (6) (7)

- (1) Mountable Relays
 - S: Relays
 - Z: Sockets
- (2) Input/Output Classification
 - I: For input
 - O: For output
- (3) I/O Specification

(Applicable when (2) is O (for output) (relay output).)

- D: DC (Applicable when (2) is I (for input) (coil for input).)
- M: AC/DC (Applicable when (1) is Z (Sockets).)
- (4) Number of I/O Points
 - 16: 16 points
- (5) Terminal Type
 - P: Push-In Plus terminal blocks
- (6) Common Line on Connector Side
 - Blank: NPN
 - 1: PNP
- (7) Common Line on Terminal Block Side

Blank: No internal connections

- Every 4 points internally connected at terminal block bottom row
- C4-D: Every 4 points internally connected at terminal
 - block middle row
- C16: 16 points internally connected

Ordering Information

I/O Relay Terminals

Terminals	Classification	Points	Common Line		Rated	Model
Terminais	Classification		Terminal Block Side	Connector Side	voltage	Wiodei
		16	No internal connections	NPN (- common)		G70V-SID16P
	Input *1		No internal connections	PNP (+ common)	24 VDC	G70V-SID16P-1
	Πραί ক		16 points internally connected	NPN (- common)		G70V-SID16P-C16
Push-In Plus			To points internally connected	PNP (+ common)		G70V-SID16P-1-C16
terminal blocks	Output ste?		No internal connections	NPN (+ common)		G70V-SOC16P
			No internal connections	PNP (- common)		G70V-SOC16P-1
	Output *2		Every 4 points internally connected	NPN (+ common)		G70V-SOC16P-C4
			at terminal block bottom row	PNP (- common)		G70V-SOC16P-1-C4

*1. Mountable Relays: G2RV-1-S-AP-G DC21V.

*2. Mountable Relays: G2RV-1-S-G DC21V.

I/O Terminal Sockets

Applicable I/O Relay Terminal	Classification	Common L	Model	
Applicable I/O Relay Terminal	Classification	Terminal Block Side	Connector Side	Wiodei
G70V-SID16P		No internal connections	NPN (- common)	G70V-ZID16P
G70V-SID16P-1	Input	No internal confidentions	PNP (+ common)	G70V-ZID16P-1
G70V-SID16P-C16	input	16 points internally connected	NPN (- common)	G70V-ZID16P-C16
G70V-SID16P-1-C16		To points internally connected	PNP (+ common)	G70V-ZID16P-1-C16
G70V-SOC16P		No internal connections	NPN (+ common)	G70V-ZOM16P
G70V-SOC16P-1		No internal connections	PNP (- common)	G70V-ZOM16P-1
G70V-SOC16P-C4	Output	Every 4 points internally connected	NPN (+ common)	G70V-ZOM16P-C4
G70V-SOC16P-1-C4	Output	at terminal block bottom row	PNP (- common)	G70V-ZOM16P-1-C4
*		Every 4 points internally connected	NPN (+ common)	G70V-ZOM16P-C4-D
op		at terminal block middle row	PNP (- common)	G70V-ZOM16P-1-C4-D

Note: 1. Relays are not mounted to the G70V-ZID16P(-1)(-C16) I/O Terminal Sockets. Combine the I/O Terminal Sockets with Slim I/O Relays. 2. Relays are not mounted to the G70V-Z0M16P(-1)(-C4) I/O Terminal Sockets. Combine the I/O Terminal Sockets with Slim I/O Relays or Slim I/O SSRs. *The G70V-ZOM16P(-1)-C4-D does not come with SSRs. Use Slim I/O SSRs (for DC: G3RV-D03SL).

Options (Order Separately) **Mountable Relays**

Applicable I/O Relay Terminal	Classification	Туре			Model
G70V-SID16P(-1)(-C16) G70V-ZID16P(-1)(-C16)	Input	Slim I/O Relays *1			G2RV-1-S-AP-G DC21
	Output	Slim I/O Relays	No Latching Le	ever * 2	G2RV-1-S-G DC21
070\/ 00040B/ 4\/ 04\		Silli i/O Relays	Latching Lever	-	G2RV-1-SI-G DC21
G70V-SOC16P(-1)(-C4) G70V-ZOM16P(-1)(-C4)		Slim I/O SSRs	For AC	Zero cross function	G3RV-202S DC24
270V 20M101 (1)(04)			FOI AC	No zero cross function	G3RV-202SL DC24
			For DC		G3RV-D03SL DC24
G70V-ZOM16P(-1)-C4-D *3	Output	Slim I/O SSRs	For DC		G3RV-D03SL DC24

Note: When using Slim I/O SSRs, either remove the Slim I/O Relays from the output G70V-SOC16P(-1)(-C16) to mount them, or order the output G70V-ZOM16P(-1)(-C16) I/O Terminal Sockets and the Slim I/O SSRs separately and combine them.

· MIL connectors

*1. G2RV-1-S-AP-G Slim I/O Relays are mounted to G70V-SID16P(-1)(-C16) I/O Relay Terminals as a standard feature. *2. G2RV-1-S-G Slim I/O Relays are mounted to G70V-SOC16P(-1)(-C4) I/O Relay Terminals as a standard feature.

XW2Z-RA□C

*3. The G70V-ZOM16P(-1)-C4-D does not come with SSRs. Use Slim I/O SSRs (for DC: G3RV-D03SL). When ordering, designate the rated voltage

Main Unit (Relay)

Ratings

Coil Ratings (Common to Input/Output per Relay)

Rated voltage (V)	Rated current (mA)	Coil resistance (Ω)	Must operate of rated voltage	Must release of rated voltage	Maximum voltage of rated voltage	Power consumption (mW)
24 VDC	13.3	1,575	80% max.	10% min.	110%	Approx. 280

- Note: 1. The rated current and coil resistance are measured at a coil temperature of 23°C with a tolerance of ±15% for coil resistance.
 - 2. The operating characteristics are measured at a coil temperature of 23°C.
 - 3. The value for maximum voltage is the maximum value within the allowable voltage fluctuation range for the relay coil's operating power supply. Continuous operation at this voltage is not within product specifications.
 - 4. The rated current includes the current for the indicators on the I/O Relay Terminal.

Contact Ratings (Per Relay)

Classification	For input (G2RV-1-S-AP-G)	For output (G2RV-1-S-G/G2RV-1-SI-G)			
Item	Resistive load (cos	Resistive load (cosφ=1)	Inductive load (cosφ=0.4 L/R=7 ms		
Rated load 50 mA at 30 VAC 50 mA at 36 VDC		6 A at 250 VAC 6 A at 30 VDC	2.5 A at 250 VAC 2 A at 30 VDC		
Rated carry current	50 mA	6 A/point, 10 A/common (with -C4 installed)			
Max. switching voltage	30 VAC, 36 VDC	250 VAC, 125 VDC			
Max. switching current	50 mA	6 A/point, 10 A/common (with -C4 installed)			
Maximum switching capacity		1,500 VA 180 W	500 VA 60 W		
Error rate (reference value) *	1 mA at 100 mVDC	10 mA at 5 VDC			
Electrical endurance	5,000,000 operations min.	NO contacts: 70,000 operations min. NC contacts: 50,000 operations min.			
Mechanical endurance	5,000,000 operations min.	5,000,000 operations min.			

^{*}The above values are for a switching frequency of 120 operations/min.

Characteristics

G70V-ZOM16P-1

(PNP output/- common)

Note: A controller with an NPN transistor, common output can be connected to the G70V-ZOM16P-1.

- Note: 1. Pin numbers are indicated for convenience. The \blacktriangle mark can be used to determine orientation.
 - 2. A controller with an PNP transistor, + common output can be connected to the G70V-ZOM16P-1.
 - 3. Relays are not mounted.

Terminal name	Description	
V (push-in power supply terminals)	- Unit power supply terminals (24 VDC)	
G (push-in power supply terminals)		
11 to 81 (push-in I/O terminal common terminals)		
12 to 82 (push-in I/O terminal NC terminals)	Relay contact terminals	
14 to 84 (push-in I/O terminal NO terminals)		

G70V-ZOM16P-C4

(NPN output/+ common)

Note: A controller with an PNP transistor, + common output can be connected to the G70V-ZOM16P-C4.

- Note: 1. Pin numbers are indicated for convenience. The ▲ mark can be used to determine orientation.
 - 2. A controller with an NPN transistor, common output can be connected to the G70V-ZOM16P-C4.
 - 3. Relays are not mounted.
 - 4. Limit to 10 A/4-point common.

Terminal name	Description	
V (push-in power supply terminals)	- Unit power supply terminals (24 VDC)	
G (push-in power supply terminals)	offit power supply terminals (24 VDC)	
11 to 81 (push-in I/O terminal common terminals)		
12 to 82 (push-in I/O terminal NC terminals)	Relay contact terminals	
14 to 84 (push-in I/O terminal NO terminals)		

G70V-ZOM16P-1-C4

(PNP output/- common)

Note: A controller with an NPN transistor, common output can be connected to the G70V-ZOM16P-1-C4.

- Note: 1. Pin numbers are indicated for convenience. The \blacktriangle mark can be used to determine orientation.
 - 2. A controller with an PNP transistor, + common output can be connected to the G70V-ZOM16P-1-C4.
 - 3. Relays are not mounted.
 - 4. Limit to 10 A/4-point common.

Terminal name	Description	
V (push-in power supply terminals)	Unit power supply terminals (24 VDC)	
G (push-in power supply terminals)	Offic power supply terminals (24 VDC)	
11 to 81 (push-in I/O terminal common terminals)		
12 to 82 (push-in I/O terminal NC terminals)	Relay contact terminals	
14 to 84 (push-in I/O terminal NO terminals)		

G70V-ZOM16P-C4-D

(NPN output/- common)

Note: A controller with an NPN transistor, common output can be connected to the G70V-ZOM16P-C4-D.

Note: 1. Pin numbers are indicated for convenience. The ▲ mark can be used to determine orientation.

2. Limit to 10 A/4-point common.

Terminal name	Description	
V (push-in power supply terminals)	Unit power supply terminals (24 VDC)	
G (push-in power supply terminals)		
11 to 81 (push-in I/O terminal SSR output terminal +)	SSR contact terminals	
12 to 82 (push-in I/O terminal Open terminal)		
14 to 84 (push-in I/O terminal SSR output terminal -)		

^{*}The G70V-ZOM16P-C4-D does not come with SSRs. Use Slim I/O SSRs (for DC: G3RV-D03SL).

G70V-ZOM16P-1-C4-D

(PNP output/- common)

Note: A controller with an PNP transistor, common output can be connected to the G70V-ZOM16P-1-C4-D.

Note: 1. Pin numbers are indicated for convenience. The ▲ mark can be used to determine orientation.

2. Limit to 10 A/4-point common.

Terminal name	Description	
V (push-in power supply terminals)	Unit power supply terminals (24 VDC)	
G (push-in power supply terminals)	Offic power supply terminals (24 VDC)	
11 to 81 (push-in I/O terminal SSR output terminal +)	SSR contact terminals	
12 to 82 (push-in I/O terminal Open terminal)		
14 to 84 (push-in I/O terminal SSR output terminal -)		

^{*}The G70V-ZOM16P-1-C4-D does not come with SSRs. Use Slim I/O SSRs (for DC: G3RV-D03SL).

Dimensions (Unit: mm)

Main unit

I/O Relay Terminals and I/O Terminal Sockets

For Inputs
G70V-SID16P
G70V-SID16P-1
G70V-ZID16P
G70V-ZID16P-1
G70V-SID16P-C16
G70V-SID16P-1-C16
G70V-ZID16P-C16
G70V-ZID16P-C16

Note: 1. Relays are not mounted to the G70V-ZID16P(-1)(-C16) I/O Terminal Sockets.

2. Specified screw mounting torque: 0.59 to 0.98 N·m.

For Outputs G70V-SOC16P G70V-SOC16P-1 G70V-ZOM16P G70V-ZOM16P-1 G70V-SOC16P-C4 G70V-SOC16P-1-C4 G70V-ZOM16P-C4 G70V-ZOM16P-1-C4 G70V-ZOM16P-C4-D G70V-ZOM16P-1-C4-D

Note: 1. Relays are not mounted to the G70V-ZOM16P(-1)(-C4)(-D) I/O Terminal Sockets.

2. Specified screw mounting torque: 0.59 to 0.98 N·m.

Terminal Arrangement/Internal Connection

For Inputs G70V-SID16P G70V-SID16P-1

G70V-ZID16P G70V-ZID16P-1

 Supply a power supply that meets the voltage specifications for both the Relays and I/O Relay Terminal to the V and G terminals.

Make sure that the polarity is correct.

The V terminals are positive and the G terminals are negative.

 Supply the rated voltage (24 VDC) of the Controller's input circuit to the power supply input terminals (V and G). Use a power supply with low noise.

Note: Relay identification numbers are displayed from 1 to 16 in order from the left of the I/O terminal block.

For Outputs

G70V-SOC16P G70V-SOC16P-1 G70V-ZOM16P G70V-ZOM16P-1

(L₀)(L₁)(L₂)(L₃)(L₄)(L₅)(L₆)(L₇)

 Supply a power supply that meets the voltage specifications for both the Relays and I/O Relay Terminal to the V and G terminals.

Make sure that the polarity is correct.

The V terminals are positive and the G terminals are negative.

- The terminals (11 to 81, 12 to 82, and 14 to 84) are contact outputs. Supply a suitable power supply for the loads.
- The power supply input terminals (V and G) supply power to both drive the Relays and to operate the Controller's output transistors.

Align the voltage specifications of the Controller and the I/O Relay Terminal.

When changing to a G3RV-D03SL, pay attention to the electrode polarity.

For Outputs G70V-ZOM16P-C4-D G70V-ZOM16P-1-C4-D

 Supply a power supply that meets the voltage specifications for both the Relays and I/O Relay Terminal to the V and G terminals.

Make sure that the polarity is correct.

The V terminals are positive and the G terminals are negative.

- The terminals (11 to 81 and 14 to 84) are contact outputs.
 Supply a suitable power supply for the loads. Make sure that polarity of the output terminal is correct.
- The power supply input terminals (V and G) supply power to both drive the Relays and to operate the Controller's output transistors.

Align the voltage specifications of the Controller and the I/O Relay Terminal.

* The G70V-ZOM16P(-1)-C4-D does not come with SSRs. Use Slim I/O SSRs (for DC: G3RV-D03SL).

Note: Relay identification numbers are displayed from 1 to 16 in order from the left of the I/O terminal block.

Safety Precautions

Be sure to read *The Safety Precautions for All I/O Relay Terminals* in the website at the following URL: http://www.ia.omron.com/product/cautions/46/243/index.html.

Warning Indications

Precautions for Safe Use	Supplementary comments on what to do or avoid doing, to use the product safely.
Precautions for Correct Use	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction, or undesirable effects on product performance.

Precautions for Safe Use

Transportation

- Do not transport the I/O Relay Terminal under the following locations. Doing so may occasionally result in damage, malfunction, or deterioration of performance characteristics.
 - · Locations subject to water or oil
 - · Locations subject to high temperature or high humidity
 - Locations subject to condensation due to rapid changes in temperature

Operating and Storage Environments

- Do not use or store the I/O Relay Terminal in the following locations. Doing so may result in damage, malfunction, or deterioration of performance characteristics.
 - · Locations subject to rainwater or water splashes
 - · Locations subject to exposure to water, oil, or chemicals
 - · Locations subject to high temperature or high humidity
 - Locations subject to ambient storage temperatures outside the range –40 to 65°C
 - Locations subject to ambient operating temperatures outside the range –40 to 55°C
 - Locations subject to relative humidity outside the range 35% to 85% or locations in which condensation may occur due to rapid changes in temperature
 - · Locations subject to corrosive gases or inflammable gases
 - Locations subject to dust, salts, or iron, or locations where there is salt damage
 - · Locations subject to direct sunlight
 - · Locations subject to shock or vibration

Installation and Mounting

 Mount the I/O Relay Terminal in the specified direction. Otherwise excessive heat generated by the I/O Relay Terminal may occasionally cause burning.

Mounting Directions

- Mount the I/O Relay Terminal firmly to a DIN Track. Otherwise, the I/O Relay Terminal may fall off.
- Do not handle the I/O Relay Terminal with oily or dusty (especially iron dust) hands.
- Make sure that there is no excessive ambient temperature rise due to the heat generation of the I/O Relay Terminal. If the I/O Relay Terminal is mounted inside a panel, install a fan so that the interior of the panel is fully ventilated.

Installation and Wiring

- Use wires that are suited to the load current and voltage.
 Otherwise, excessive heat generated by the wires may cause burning or may cause the wire covering to melt, possibly leading to electric shock.
- Do not use wires with a damaged outer covering. Otherwise, it may result in electric shock or ground leakage.
- Do not wire any wiring in the same duct or conduit as power or high-tension lines. Otherwise, inductive noise may damage the I/O Relay Terminal or cause it to malfunction.
- Do not apply a voltage or current that exceeds the rating to any terminal. Doing so may result in failure or burning.

Push-In Plus Terminal Blocks

- · Do not wire anything to the release holes.
- Do not tilt or twist a flat-blade screwdriver while it is inserted into a release hole on the terminal block. The terminal block may be damaged.
- Insert a flat-blade screwdriver into the release holes at an angle.
 The terminal block may be damaged if you insert the screwdriver straight in.
- Do not allow the flat-blade screwdriver to fall out while it is inserted into a release hole.
- Do not bend a wire past its natural bending radius or pull on it with excessive force. Doing so may cause the wire disconnection.
- Do not insert more than one wire into each terminal insertion hole.
- To prevent wire materials from smoking or igniting, confirm wire ratings and use the wiring materials given in the following table.

Recommended wire gauge	Stripping length
0.25 to 1.5 mm²/ AWG24 o AWG16 stranded wire, 0.5 to 1.3 mm solid wire	8 mm

- *The recommended wire gauge and stripping length values are for stranded wire or solid wire. When using ferrules, refer to the table of recommended ferrules in Precautions for Correct Use.
- Refer to the following table for wire sizes for external I/O devices according to the current flow.

AWG24 to AWG20	Maximum current flow: 6 A
AWG18 to AWG16	Maximum current flow: 9 A

Application

- Select a load within the rated values. Not doing so may result in malfunction, failure, or burning.
- The I/O Relay Terminal may occasionally rupture if short-circuit current flows. As protection against accidents due to shortcircuiting, be sure to install protective devices, such as fuses and no-fuse breakers, on the power supply side.
- Use a power supply within the rated frequencies. Otherwise, malfunction, failure, or burning may occasionally occur.
- Minor electric shock may occasionally occur. Always turn OFF the power supply before performing wiring.

Precautions for Correct Use

- Do not drop the I/O Relay Terminal or subject it to abnormal vibration or shock during transportation or mounting. Doing so may result in deterioration of performance, malfunction, or failure.
- Do not transport an I/O Relay Terminal when it is not packaged.
 Damage or failure may occur.
- Use a power supply with low noise.

Push-In Plus Terminal Blocks

1. Connecting Wires to the Push-In Plus Terminal Block Part Names of the Terminal Block

Connecting Wires with Ferrules and Solid Wires

Insert the solid wire or ferrule straight into the terminal block until the end strikes the terminal block.

 If a wire is difficult to connect because it is too thin, use a flat-blade screwdriver in the same way as when connecting stranded wire.

Connecting Stranded Wires

Use the following procedure to connect the wires to the terminal block.

- Hold a flat-blade screwdriver at an angle and insert it into the release hole
 - The angle should be between 10° and 15°. If the flat-blade screwdriver is inserted correctly, you will feel the spring in the release hole.
- With the flat-blade screwdriver still inserted into the release hole, insert the wire into the terminal hole until it strikes the terminal block
- 3. Remove the flat-blade screwdriver from the release hole.

Checking Connections

- After the insertion, pull gently on the wire to make sure that it will not come off and the wire is securely fastened to the terminal block.
- If you use a ferrule with a conductor length of 10 mm, part of the conductor may be visible after the ferrule is inserted into the terminal block, but the product insulation distance will still be satisfied.

2. Removing Wires from the Push-In Plus Terminal Block

Use the following procedure to remove wires from the terminal block. The same method is used to remove stranded wires, solid wires, and ferrules.

- Hold a flat-blade screwdriver at an angle and insert it into the release hole
- 2. With the flat-blade screwdriver still inserted into the release hole, remove the wire from the terminal insertion hole.
- 3. Remove the flat-blade screwdriver from the release hole.

3. Recommended Ferrules and Crimp Tools Recommended ferrules

Applicable wire			Stripping length			nmended ferrules

Recom	Recommended crimp tool		CRIMPFOX6 CRIMPFOX6T-F CRIMPFOX10S	PZ6 roto	Variocrimp4		

Note: 1. Make sure that the outer diameter of the wire coating is smaller than the inner diameter of the insulation sleeve of the recommended ferrule.

2. Make sure that the ferrule processing dimensions conform to the following figures.

Recommended Flat-blade Screwdriver

Use a flat-blade screwdriver to connect and remove wires. Use the following flat-blade screwdriver.

The following table shows manufacturers and models as of 2015/Dec.

Model	Manufacturer
ESD 0,40×2,5	Wera
SZS 0,4×2,5 SZF 0-0,4×2,5 *	Phoenix Contact
0.4×2.5×75 302	Wiha
AEF.2,5×75	Facom
210-719	Wago
SDI 0.4×2.5×75	Weidmuller

*OMRON's exclusive purchase model XW4Z-00B is available to order as SZF 0-0,4 × 2,5 (manufactured by Phoenix Contact).

Note: Contact for a cable length other than the above.

Cables that can be connected to the QX81, QX81-S2, and QY81P have not been prepared.

*1. These cables are used to connect to slave products for DeviceNet and other networks.

*2. For details on models that can be used, refer to List of Combinations with the Mitsubishi PLC MELSEC-L Series, MELSEC-Q Series, and MELSEC iQ-R Series on page 31.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Note: Do not use this document to operate the Unit.
