OMRON FACTORY AUTOMATION SERVICE

OMRON offers factory automation services tailored specifically to the operation processes of customers.

To help customers address the challenges faced at manufacturing sites, OMRON utilizes a wide range of products and its global service network to ensure full-spectrum support for design, startup, or maintenance.

For Design

These services are designed for use by those looking to begin manufacturing new products. These services can also help those looking to make further improvements. OMRON strives to embody customer's concepts while incorporating the latest technologies.

New Equipment Design Support

Consultation

Drawing from extensive knowledge and experience regarding machine safety, OMRON strives to help customers reduce design burdens and create globally competitive equipment.

On-site Environmental Diagnosis

OMRON engineers will visit your facility to investigate your equipment installation environment.

Product Training

OMRON offers various courses focusing on helping participants to master skills related to design operations.

Equipment Optimization Support

Remediation/ Additional Function Design

OMRON offers the optimal method for adding functionality to existing equipment, including design and installation work.

Migration/ Replacement of Discontinued Products

OMRON offers customers the opportunity to replace their legacy PLC systems, including software, and hardware with newer models/versions that feature equivalent functions.

Product Selection Support

Product Evaluation Loan

OMRON's Product Evaluation Loan Service allows customers considering purchasing an OMRON product to try out the functions and performance of the product before purchasing.

Proof of Concept

Using actual customer target samples and robots, OMRON determines the feasibility, measures cycle time, and provides detailed reports.

Technical Support— Product Selection Assistance

OMRON's Technical Support offers telephone consultations including product selection, operation/setting configuration, and troubleshooting in order to help customers solve problems they may be facing.

Automation Center/ Laboratory

See the latest control applications on display using actual machines. OMRON engineers are also available for consultation and to propose specific solutions to customer problems.

For Startup

These services can be used for equipment installation/construction, configuration of initial settings, or adjustment. With these services, OMRON aims to ensure smooth setup leading up to the start of on-site production.

Product Installation Support

On-Site Startup

OMRON offers on-site installation, setting, and adjustment of purchased products.

Operation /Setup Training

OMRON offers training sessions so that participants can learn products through hands-on experience with learning equipment.

Prime shipping —For Setup

When problems arise at a customer facility, OMRON will deliver the emergency replacement products as required.

Technical Support —Product Setup Assistance

OMRON's Technical Support offers telephone consultations including product selection, operation/setting configuration, and troubleshooting in order to help customers solve problems they may be facing.

For Maintenance

These services are designed for those looking to maintain and manage stable operation, and to address problems that have occurred. Through these services, OMRON is able to provide periodic inspections and rapid recovery from malfunctions.

Preventive Maintenance/Maintenance Support

Periodic Inspections

In order to discover potential device malfunctions and minor abnormalities at an early stage, OMRON carries out various periodic inspections including checks for part wear and damage.

Maintenance Training

OMRON offers various courses focusing on helping participants to master skills related to maintenance operations.

Maintenance Contracts

OMRON offers annual maintenance contract including periodic inspections and recovery support should a failure occur.

Breakdown Maintenance/Maintenance Support

Trouble Analysis

OMRON service engineers will visit your facility to investigate and improve the equipment installation environment.

On-Site Recovery

With OMRON's On-Site Recovery Service, engineers will personally visit a facility that uses OMRON products when problems arise.

Repair/Analysis

OMRON accepts repair requests for malfunctioning products. OMRON also analyzes the cause in order to prevent recurrence.

Prime shipping —For Maintenance

When problems arise at a customer facility, OMRON will deliver the emergency replacement products as required.

Technical Support —On-Site Trouble Assistance

OMRON's Technical Support offers telephone consultations including product selection, operation/setting configuration, and troubleshooting in order to help customers solve problems they may be facing.

JAPAN

In Japan, we maintain our Sales Headquarters in Tokyo (Shinjyū-ku), as well as 27 sales offices and two inventory centers to ensure that our customer's needs are met. Our Automation Center/Laboratory* showcases actual machines for various control applications that are implemented by our latest control components.

Japan Desk (Contacts in Japanese) ~Service support that makes you feel at home~

Japanese speaking representatives are ready to serve Japanese customers engaging in manufacturing all over the world.

1 To obtain local information before starting a business there.

A Japan Desk representative provides the local service support information.

2 To receive technical support for starting up new equipment outside Japan

A Japan Desk representative arranges a local engineer to support the customer.

GREATER CHINA

In the Greater China Region, we maintain our Regional Sales Headquarters in Shanghai, as well as 43 sales offices and 6 inventory centers to ensure that our customer's needs are met. For inquiries about OMRON service and support in regions where no sales offices exist, please contact our Regional Sales Headquarters in China (Shanghai).

Our Automation Center/Laboratory showcases actual machines for various control applications that are implemented by our latest control components.

AMERICAS

In North and South America, we maintain our Regional Sales Headquarters in Chicago, as well as 7 sales offices and 4 inventory centers to ensure that our customer's needs are met. For inquiries about OMRON service and support in regions where no sales offices exist, please contact our Regional Sales Headquarters in the U.S. (Chicago). Our Automation Center/Laboratory showcases actual machines for various control applications that are implemented by our latest control components.
